## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance: many references in the art disclose a similar tire pressure monitoring system for a tire of an automotive vehicle comprising a first pressure sensor coupled to a wheel, a pressure transmitter having a transmitting antenna for transmitting a pressure signal; and a controller coupled to the pressure transmitter, the controller receiving the pressure signal, comparing the pressure signal to a pressure threshold to obtain a sensor status, such that found Juzswik et al. (US 6,612,165). The prior art of record does not teach or suggest, in the claimed combination, a controller coupled to the pressure transmitter, the controller receiving the pressure signal and in a first stage, comparing the pressure signal to a pressure threshold to obtain a sensor status and in a second stage, qualifying the sensor status signal by generating a composite warning status in response to said sensor status, wherein the composite warning status provide an in-range signal when the pressure statuses have not exceeded the pressure threshold and the pressure transmitters are not in a fault condition.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
